Adding Buildings to OSM

Tailored for Virginia, using Virginia data.

~~STOGGLE_BUTTONS~~

Using Rapid

Probably the easiest way to start is by using the Rapid editor. This assumes you know how to use the Rapid editor. You can save yourself a URL with a few custom parameters to open the editor.

- Base URL: https://rapideditor.org/rapid#
- VBMP imagery:

  ```
  background=VBMPImagery_Most_Recent
  ```

- Microsoft Buildings:

  ```
  datasets=msBuildings
  ```

- Area to start in:

  ```
  map=10.37/38.1811/-79.1423
  ```

  This updates in the URL as you scroll and zoom. So just navigate the map to your favorite spot, and copy/paste.

- My favorite, Power user:

  ```
  poweruser=true
  ```

  Allows one to make large edits (>100), and use preview datasets.

My URL:
https://mapwith.ai/rapid#background=VBMPImagery_Most_Recent&datasets=msBuildings&map=10.37/38.1811/-79.1423&poweruser=true

Keyboard shortcuts:

- Select a building outline, press **A** to **a**dd it.
- **R**otate, and **M**ove. (A bug: you can't switch directly from R to M, you must 'esc' or click to escape the move or rotate mode before selecting the other mode) #818
- If address node exists, Shift+click to select building and address, then **C**ombine.
